

Accessory: ToolHolder

Safer transport of tool holding fixtures!

Material

- Polyethylene (PE)

Product Range

- ToolHolder insert in black
- BlockPack (not included in ToolHolder delivery) in natural or in a variety of attractive colors
- ToolHolder as well as BlockPack outer and inner parts are packed separately in individual cartons
- Information on the compatibility of the respective ToolHolder sizes with our BlockPack packaging tube can be found on the last page of the data sheet

Product features ToolHolder

ToolHolder combined with the BlockPack results in a high quality, stable single package that provides optimum protection for PSC, KM, HSK or SK tool holding fixtures. The perfectly adapted ToolHolders ensure a tight fit of the tool holders in axial and radial direction. The length-adjustable BlockPack with grids and TwistLock mechanism is the ideal basis. It enables precise adjustment, thus removing the need for additional foam inserts.

- ToolHolder in combination with BlockPack provides perfect packaging safety
- tight fit of the tool holders in axial and radial direction
- quick loading, efficient packing, simple removal
- the combination of ToolHolder insert and BlockPack tube reduces the packaging variety and saves warehouse resources
- high quality and sturdy individual packaging
- highly secure closure, but with minimal force in opening and closing the pack
- excellent for stacking and storage
- durable and reusable
- sturdy, oil, and moisture resistant

Product Range: ToolHolder
